PROFILE

Results-driven Digital Product Manager with a strong foundation in software engineering and over 4 years of experience in the tech industry. Specializing in the FinTech sector, currently leading the Mini Apps own development for KBZPay, managing developer coordination and key vendor relationships. Adept at translating complex business requirements into scalable, user-centric products by leveraging a deep understanding of full-stack technologies and API integration.

WORK EXPERIENCE

KBZPay Mini Apps/KBZ Bank

Digital Products Manager

Jul 2025 - Present

- Authored and finalized BRD/FRD for all proprietary mini-app developments.
- Managed development execution as the Primary Point of Contact (PIC), ensuring clear communication between business and tech teams.
- Drove timely project completion by meticulously tracking and managing developer task deadlines.
- Facilitated project clarity by creating and presenting detailed new feature demonstrations.
- Developed internal departmental tools to enhance operational efficiency and workflows.
- Supported merchant developments through comprehensive review of BRDs, FAQs, and T&Cs.

AYA Pay/AYA Bank

Technical Operations Engineer

Oct 2022 - Jun 2025

- Spearheaded biller integration and development, ensuring seamless API integration with external clients.
- Collaborated with business teams to gather requirements and deliver tailored solutions for online merchant integration.
- Managed multilingual system deployment, enhancing user experience across diverse markets.
- Conducted biller testing and client consultations to ensure system functionality and alignment with business goals.
- Documented development processes and implemented SCRUM methodology to improve project efficiency.

PERSONAL INFO

- Birthday : 1 - April - 1999

United Pharma Myanmar

- IT SupervisorMay 2022 - Aug 2022
- Supervised IT operations, ensuring system stability and security.
 - Led system/application development projects, delivering solutions on time and within budget.
 - Collaborated with cross-functional teams to implement new technologies and improve operational efficiency.

BLife - MICT Park

- System Analyst / Software DeveloperJun 2020 - Jan 2022
- Designed and developed web applications using React.js, Node.js, and PHP (Laravel framework).
 - Enhanced POS systems and implemented data management solutions to streamline operations.
 - Provided user support and training programs to ensure effective system adoption.
 - Maintained and optimized existing systems, ensuring high performance and reliability.

KEY ACHIEVEMENTS

- KBZPay Mini App Ecosystem: Spearheaded the end-to-end in-house development of a standardized Hotel Template, streamlining merchant onboarding and expanding the Mini App service portfolio.
- AppCube Bootcamp & Hackathon: Supervised technical teams during the AppCube initiative, personally securing 3rd Place for "Best Mini App Idea & Execution" out of numerous competing projects.
- AYA Pay Interoperability: Engineered the integration of multiple billers and APIs for AYA Pay 3.0 and AYA Mobile Banking 3.0, significantly improving system interoperability and ecosystem scalability.
- Operational Optimization (BLife): Overhauled POS systems and data management protocols, resulting in a measurable increase in operational efficiency and data accuracy.
- Product Advocacy: Designed and delivered comprehensive user training programs, driving a significant increase in system adoption while reducing post-launch support tickets.
